| | |
| | revenues, in particular, locally generated property taxes. This is referred to as State "equalization aid." To the extent local tax revenues increase due to growth in local property assessed valuation, the additional revenue is offset by a decline in the State's contribution. |
| | The District's base revenue limit per A.D.A. is budgeted to be \$6,351 for fiscal year 2010-11, compared to an amount of \$6,376 for 2009-10. The District's recent A.D.A. history for grades K through 12, including special education, is set forth in the table below: |
| | Sacramento City Unified School District Total Grades K-12 Second Period (P-2) Average Daily Attendance |

In basic aid districts, the opposite is generally true: increasing enrollment does increase the revenue limit, but since all revenue limit income (and more) is already generated by local property taxes, there is no increase in

State income, other than the \$120 per student in basic aid received in the form of categorical aid, as described above. Meanwhile, as new students impose increased operating costs, property tax income is stretched further. Declining enrollment does not reduce property tax income, and has a negligible impact on State aid, but eventually reduces operating costs, and thus can be financially beneficial to a basic aid district.

For revenue limit districts, any loss of local property taxes is made up by an increase in State equalization gid until the base revenue limit is reached. For basic aid districts, the loss of tax revenues is not reimbursed by the

State.

State funds for special (categorical) programs in fiscal year 2010-11 are budgeted at approximately \$109 million, including the State lottery fund portion. Lottery funds may not be used for non-instructional purposes, such as the acquisition of real property, the construction of facilities, or the financing of research. School districts receive lottery funds proportional to their total A.D.A. The District's total State lottery revenue is budgeted at \$6.3 million, or about 1.5% of general fund revenue in fiscal year 2010-11.

The District cannot make any predictions regarding how the current economic environment or changes

In its fiscal year 2010-11 budget, the District estimates that it will expend approximately \$332 million in salaries and benefits, or approximately 80% of its general fund expenditures. This amount represents an increase of 2.8% from the \$323 million the District expended in fiscal year 2009-10.

Labor Relations. Approximately 4,700 employees are represented by various labor organizations as shown in the table below. The remainder are not represented by any formal bargaining unit.

District Cash Flows

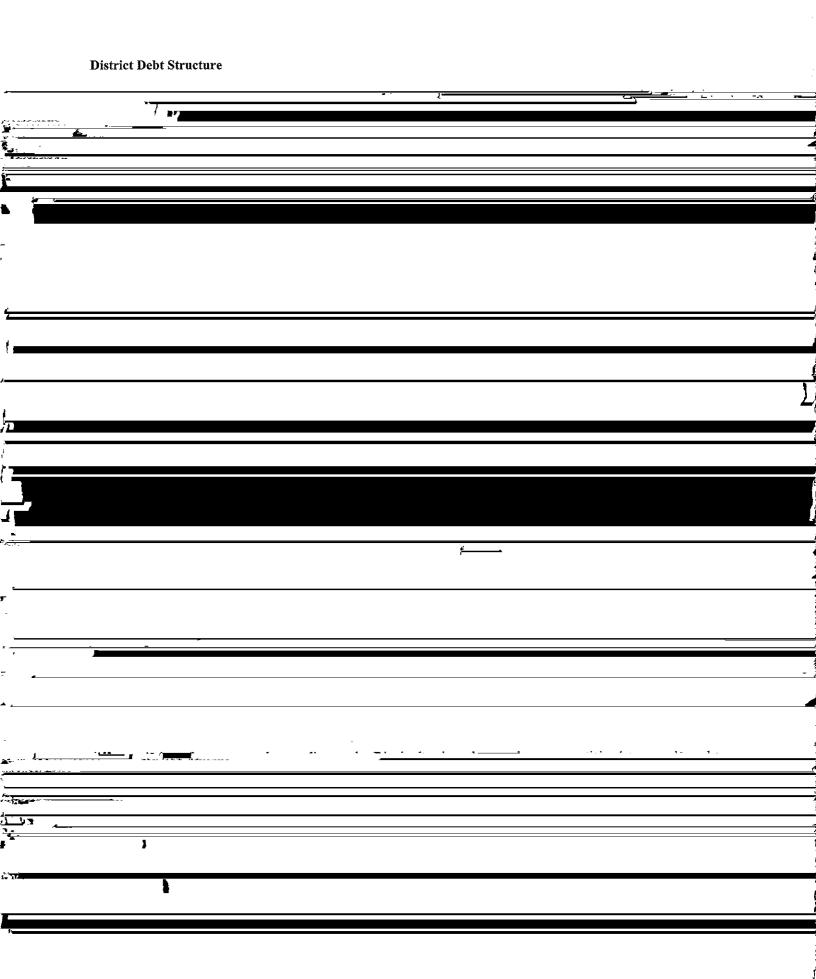

| | The District's general fund expenditures tend to be heaviest in the middle and end of the school year and lightest during the summer months. Receipts follow an uneven pattern, primarily because secured tax installment |
|------------|--|
| • | payment dates are in December and April. The District exercises virtually no control over the amount or timing o its own revenues. The level of receipts depends on assessed value of taxable property and State income. See "-State Funding of Education: State Budget Process" above. The timing of receipt of State funds is dictated by statute. |
